**(54) Title:** INTERFACE FOR TRANSMITTING TRACE INFORMATION

**(S7) Abstract:** A method for transmitting trace data to a network tester (NT), in which case the data transmission between a mobile terminal (1) and a network (9) is traced. The trace data (11) is transmitted by using a standardized interface specification (3), in which case the setting of the trace parameters and communicating the trace data via specific AT commands (10) are at the same time controlled. The method is applied by a trace system, which comprises a network tester (NT) and a mobile terminal (1), which is arranged for collecting trace data and for communicating it to the network tester (NT), a standardized interface (3) and control means (14, 15) for setting the trace parameters and for communicating the trace data, which can be controlled with specific AT commands (10). The network tester of the system, which is arranged to collect trace data (11), which applies to said data transmission, comprises a standardized interface (3).
